BOROUGH OF TIVERTON

ANNUAL REPORT

For the Year 1948

PUBLIC HEALTH OFFICERS OF THE
AUTHORITY

(a)

Part time M.O.H.

G. Nicholson, M.D., F.R.C.S., D.P.H.

Medical Officer to the Hospital:

T. N. Rudd, M.D., M.R.C.P.

District Medical Officer to Guardians:

G. Nicholson, M.D., F.R.C.S., D.P.H.

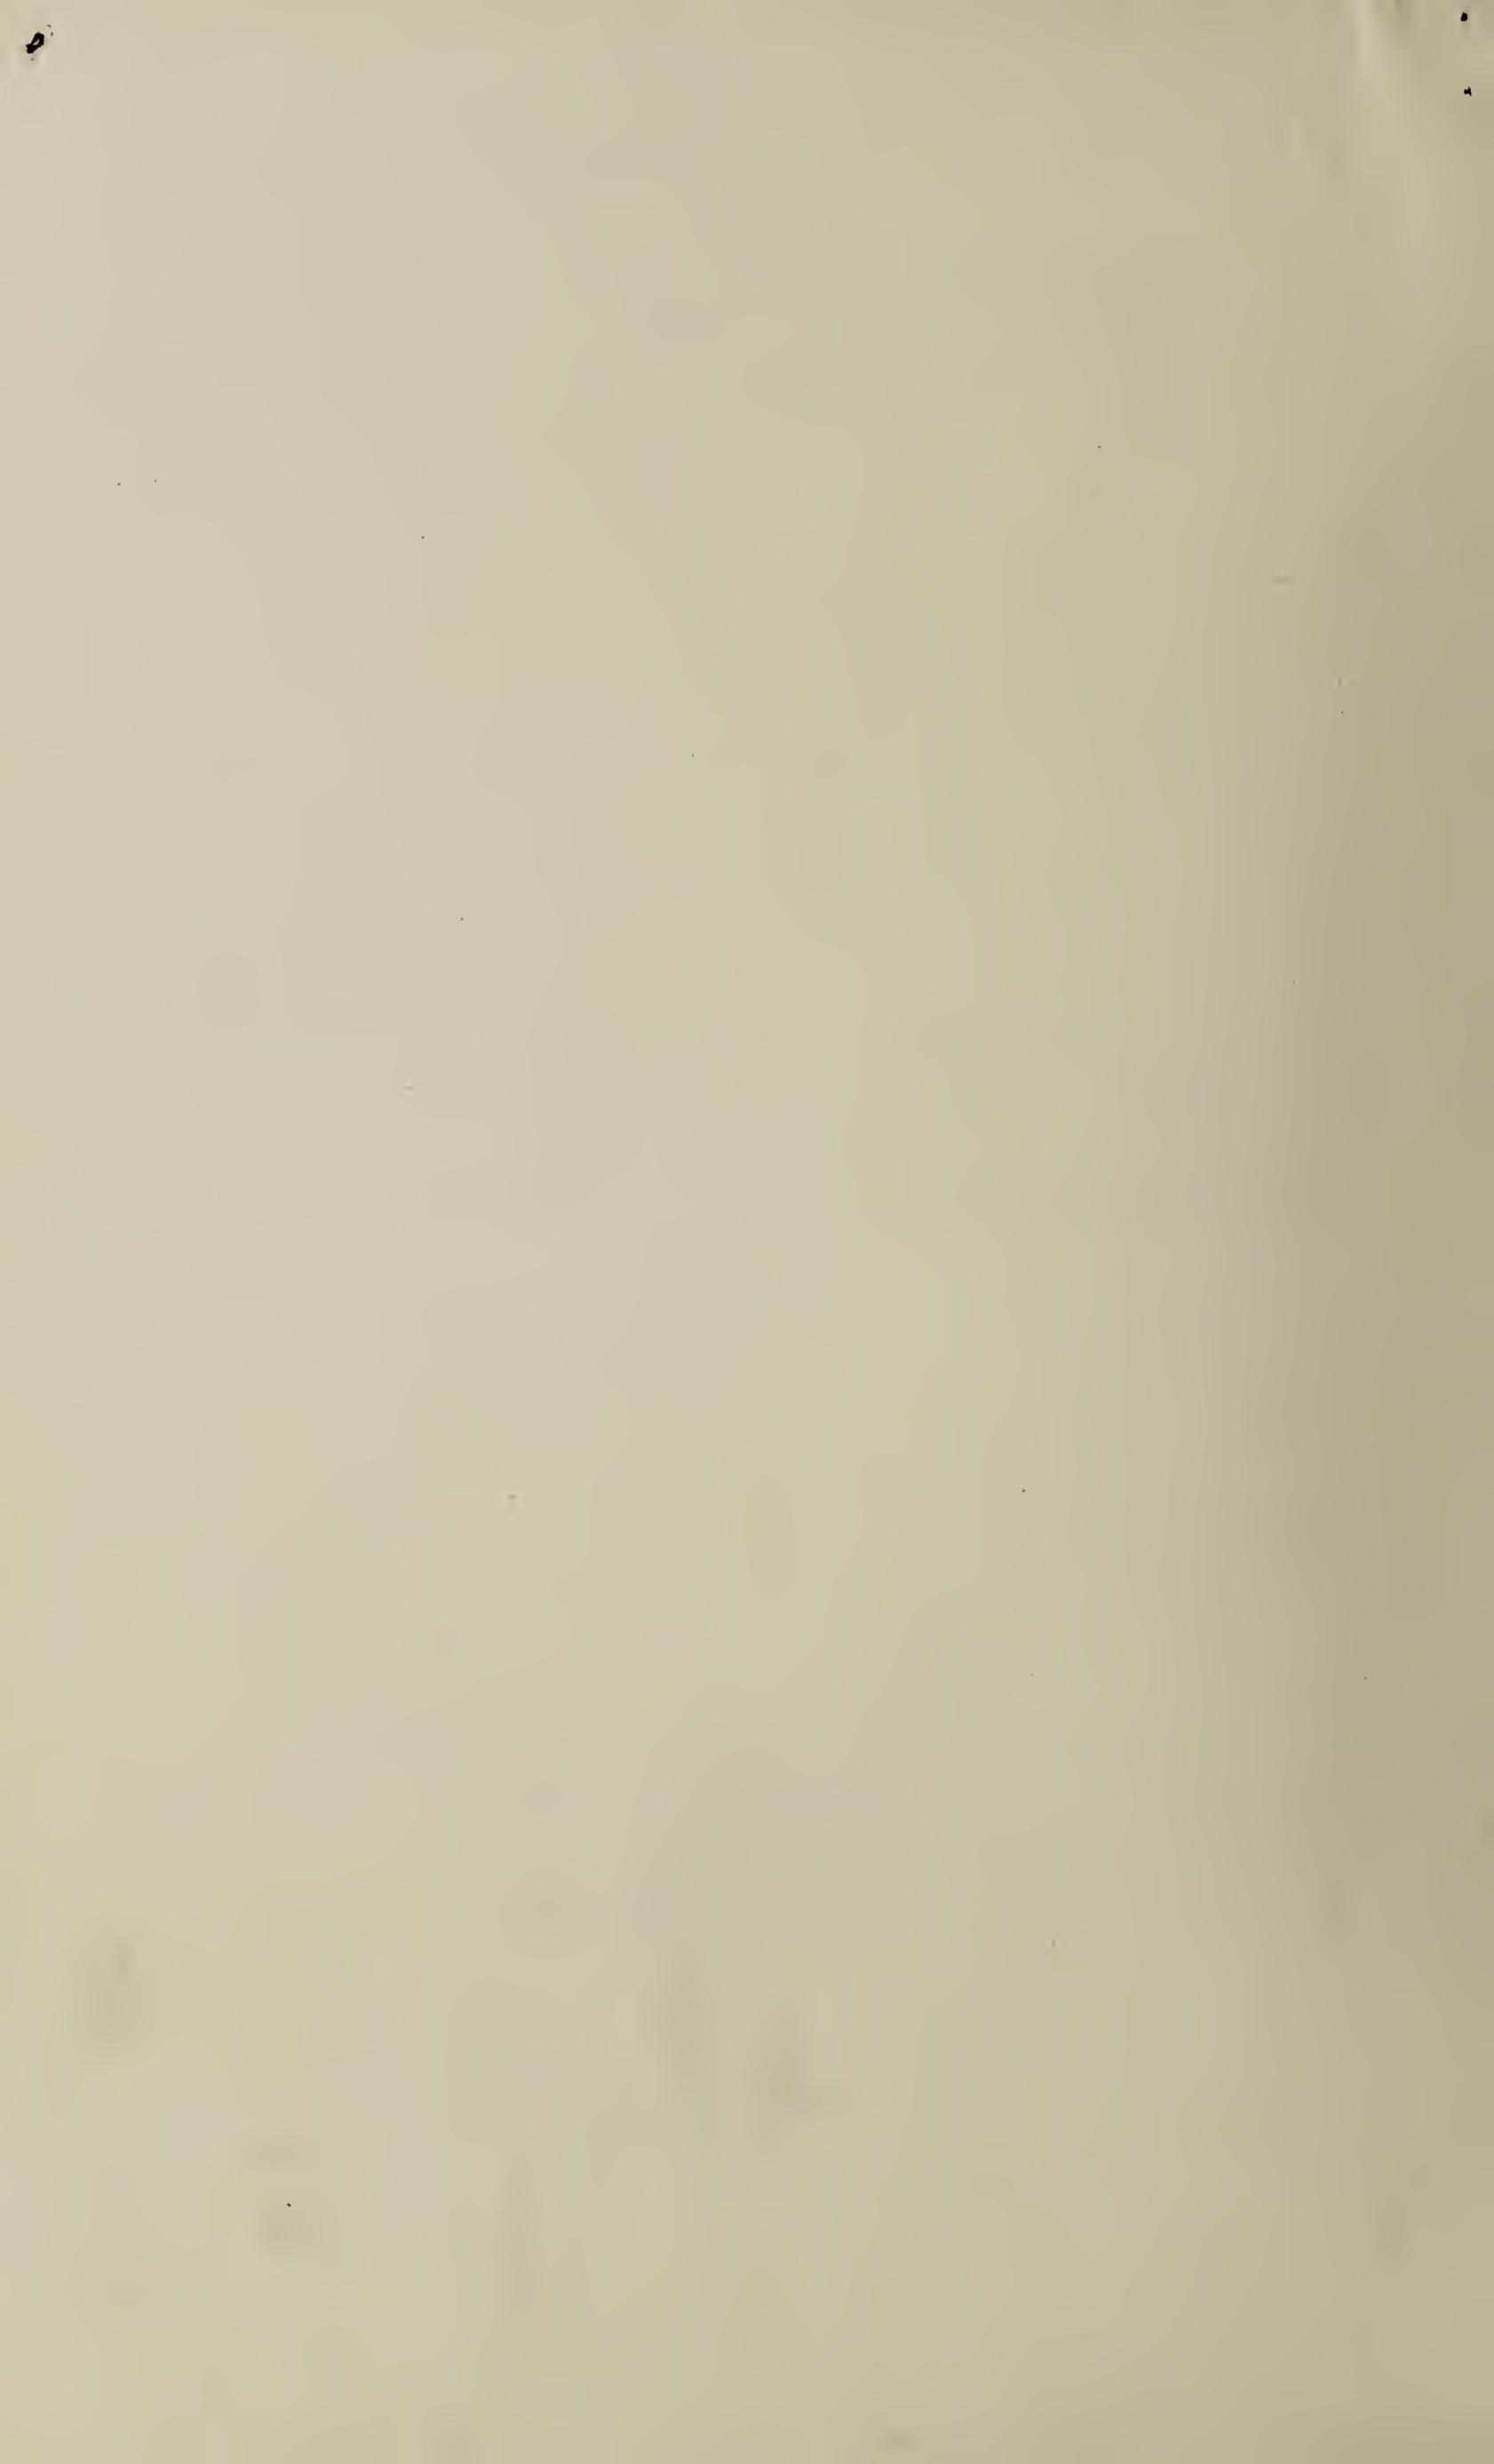

(b)

Sanitary Inspector
and Meat and Food Inspector

Charles Jeffries.

M.S.I., C.K.S.I.

REPORT OF THE
MEDICAL OFFICER OF HEALTH
to the Borough of Tiverton
For the year ended 31st December, 1948

II, St. Peter Street,

Tiverton,

May, 1949.

Gentlemen,

I have the honour to lay before you my Annual Report on the Health of the District for the year ending 31st December 1948.

Area. Although the Borough covers an area of 17,680 acres, the Town itself covers 300 acres only.

Population 11,230

Inhabited Houses. Number in 1948 was 3182

Rateable Value is £67,932

Sum represented by a Penny Rate £275

Extracts from Vital Statistics

	Total	Males	Females	
Live Births { Legitimate	201	105	96	Birth Rate:
Illegitimate	6	3	3	18.4 per 1000
Still Births	6	3	3	Rate per 1000
				Births 28.2
Illegitimate Still Births	Nil.			(Total Live & Still Births)
Deaths	127	62	65	Death Rate:
				11.3 per 1000

Deaths from Pregnancy and Childbirth, 0. Puerperal Sepsis 0. other causes 0.

Death rate of Infants under 1 year of age. All infants per 1000 live births .. 28.9

Legitimate infants per 1000, legitimate live births 24.8

Illegitimate infants, under one year. 1 death.

Deaths from Measles Nil

" from Whooping Cough Nil

" from Diarrhoea Nil

The Death Rate for England and Wales was 10.8 and the Birth Rate 17.9. The Infantile Death Rate for England and Wales was 34 per 1,000 live Births.

Deaths from Cancer Breast 1, Oesophagus 2 Stomach and Duodenum 2 Other sites 14 Total 19

General Provision of Health Services for the Area.

(1) Nursing In The Home. No change.

(2) There is one Midwife practising in the Area, in addition to the four district nurses.

(3) Laboratory Facilities. There are two in the Area - The County Laboratory and that connected with the Royal Devon & Exeter Hospital.

(4) Hospitals. There are two in the Area. The Tiverton Joint Isolation Hospital has proved seriously inadequate owing to the lack of staff which, I am given to understand, is unobtainable. The above hospital was closed for the reception of infectious diseases during the year. Cases are now received at the Isolation Hospital, Whilton Exeter.

Tiverton and District Hospital deals with surgical, medical and maternity cases. There are 50 beds, 11 of which are devoted to maternity cases. Accommodation is very strained at times in all departments and is not really adequate. Maternity cases are regularly refused booking owing to lack of space.

A Tuberculosis Clinic is now held at the above Hospital twice monthly.

(5) Institutional Provision for Unmarried Mothers. None in the Area.

(6) Ambulance Facilities. No Change.

(7) Clinics and Treatment Centres:-

Out-patient departments (under control of the Local Authority) :-
- School Minor Ailments, each morning, 9 to 10 a.m.
/Wednesday, 1.30 p.m. in attendance, 9 to 12 noon.

Maternity & Child Welfare Centre. This Centre is open weekly on Wednesdays 2-4 p.m.

Intemittent clinic at the Tiverton and District Hospital on Tuesday 3 p.m.

The attendances for 1948 were as follows:-

Total infants attending for first time	III
" children, 1 to 5 years, attending for first time			14
Number on Register at end of year - Mothers	275
" " " " Infants	169
" " " " I to 5 years	106
Number of attendances during 1947 - Mothers	2021
" " " " Infants	1535
" " " " I to 5 years	619

The Mothers and Children have had supervision and advice both at the Welfare weekly by the Medical Officer and the Health Visitor, and in their houses by the Health Visitor. Simple treatment has been given where considered sufficient, in other cases the mothers were referred to their private doctor for treatment.

The Orthopaedic Clinic was held on 49 Tuesdays during the year - 12 sessions by the Surgeon and 37 by the after-care Sister.

Number on Register, 1/1/48	327
" " " 31/12/48	286
Sessions held	49
New Cases	175
Discharges	302
Admitted to Hospital	23

Average weekly attendance	28.5
Number of attendances	1417
Admissions :- Adults	175					
" I.T.P.	I					
School Age	67					
" I.T.P.	I					
Infants	17					
	261					

Some of the elder patients have been trained at St. Loe's College for the Disabled, in connection with the Clinic, the aim being the complete rehabilitation of the patients.

Prevalence of and Control over Infectious and other Diseases.

Scabies This appears to be diminishing.

Diphtheria Immunization. A regular monthly clinic is held for this purpose and it is well attended. Administration of this procedure was transferred to the County Council during the year.

Tuberculosis. New Cases and Mortality in 1948.

I have the honour to be,

Your obedient Servant,

GEORGE NICHOLSON

Medical Officer of Health.

REPORT OF THE SANITARY INSPECTOR

to the Borough of Tiverton

1st January to 31st December, 1948

Sanitary Inspector's Office,
Town Hall, Tiverton.
15th June 1949.

To His Worship the Mayor, Aldermen and Councillors
of the Borough of Tiverton.

Mr. Mayor, Madam and Gentlemen,

I have the honour to present this, my third Annual Report on the work carried out in my department during the year ended 31st December, 1948.

It has not been possible to carry out systematic house to house reconditioning of unfit houses, but many individual premises have been repaired and improvements to sanitary conveniences and washing facilities carried out as the result of informal action.

The number of applicants on the Council's Housing List continues to be high, in spite of the considerable number of families rehoused by the Council since the end of hostilities.

Also there appears to be a fairly large floating population, which adds considerably to the number of premises requiring inspection in connection with the Points Scheme.

The number of applications at December 1948 was 387, and the family groups were as follows:-

	Residing in Borough	Residing outside Borough	Combined Total
(1) Aged Couples	9	1	10
(2) Aged Widows	4	1	5
(3) Single Men desirous of marrying	4	1	5
(4) Young married couples without children	63	12	75
(5) Married couples with 1 child	133	22	155
(6) Married couples with 2 children	68	11	79
(7) Married couples with 3 children	37	3	40
(8) Married couples with more than 3 children	15	5	18
Totals	331	56	387

It will be noted from a perusal of the above table that there appears to be a great need for a two bedroom house and the Housing Committee did in fact decide after consideration of a report giving these figures to include a number of 2 bedroom maisonettes or flats in their housing programme.

A distressing feature of the housing shortage is the number of families who are without separate homes and the following table

gives the proportion of such families to the Total, and also the proportion of applicants engaged in agriculture or associated industry.

SUMMARY OF LIVE APPLICATIONS

Classification of Applicants	Total No. of Separate Families	No. of applicants included in Col. (2)	No. of app- licants in- cluded in Col. (2) who are Agricultural Workers.	No. Of app- licants in- cluded in Col. (2) who are Associated Agra- cultural Ind:
(1)	(2)	(3)	(4)	
	Borough Outside Borough	Borough Outside Borough	Borough Outside Borough	
A. Without Sep- arate Homes.	155	27	8	2
B. With Separ- ate Homes.	176	29	5	-
C. Total	331	56	13	2
				16 22 38 5

It is gratifying to learn that following consideration by the Housing Committee of the Ministry of Health's recent report of the Housing Management Sub-Committee of the Central Housing Advisory Committee it was decided that the Council's Points Scheme so closely approximated to the suggestions contained in the Ministry's report that it was unnecessary to amend our own points scheme.

I would like to record my appreciation of the great assistance afforded me by Miss R. Newton, clerk in my department, in connection with the Council's Points Scheme for the letting of houses.

The Borough boundaries embrace a large area of country typically rural in character, much of which being devoted to dairy farming. As a result of inspections and advice from myself a number of cowsheds and dairies have been reconstructed and several new cowsheds and dairies provided, whilst several are in course of construction. A considerable number of visits have been made in connection with Ministry of Agriculture Grant Aid Scheme to improve water supplies and the suitability of proposed sources of supply investigated.

Sanitary Circumstances of the Area

Water Supply

- (1) The water supply for the Town has been satisfactory in quality and quantity.
- (2) Bacteriological examinations have been made at regular monthly intervals of the treated water going into supply.
Water from the Allers supply (source springs at Norwood Common, supplemented by pumping from River Lee) is both filtered and chlorinated.
- (3) Water from the Burncombe Supply is only chlorinated.
- (4) The water has no plumbosolvent action.
- (5) No contamination during year.

The number of dwelling houses in the Borough and population supplied from public mains are 2732 houses, 11230 population. The water is piped in direct to approximately 2192 houses, whilst approximately 540 houses are supplied by means of stand pipes. These latter houses being situated principally in Courts.

RODENT CONTROL

The Council's Rodent Operator, Mr. E. Luxon, has completed a further year's good work and it is noticeable that infestations at private dwellings in the town have almost completely been wiped out.

I feel confident that regular treatment of the Council's sewers is largely responsible for this and infestation in these sewers is now confined to a very small section of the town.

During the past year treatments have been necessitated largely at or adjacent to premises where domestic animals (poultry and pigs) have been kept.

The Borough Council's surface properties, refuse tip, salvage depot etc, have been regularly treated and it is possible to report that there are no reservoir type infestations existing in the area. Major infestations are few apart from farms in the area where they are frequent.

I have received several expressions of appreciation of the Council's rodent service from large business concerns during the year and I can confidently state that the service is performing a most useful public Health service in ridding the district of rats and mice.

PETROLEUM (CONSOLIDATION) ACT, 1928

48 Licences were reissued for the storage of 98,025 gallons of petroleum spirit, 4000 gallons of Crude Benz, 600 gallons of Tractor Vaporizing oil, 230 gallons paraffin, 100 gallons cellulose and 50 gallons of Naptha.

5 premises were inspected and advice on mode of storage given in respect of new applications and licences granted.

43 Premises were revisited in respect of annual licencing.

3 Licences issued for storage of Carbide of Calcium.

EXPLOSIVES ACT 1875

13 Applications were received for the registration of premises for the storage of gunpowder and mixed explosives. The premises of all applicants were inspected and reports made to the General Purposes Committee.

13 Certificates of registration were granted.

In conclusion, I wish to express my appreciation of the very helpful attitude of the Public Health and Housing Committees to me in my endeavour to serve the interest of the Council and the residents of the town.

I have derived great pleasure from the past year's work.

I remain,

Yours faithfully,

CHARLES JEFFRIES, M.S.I.A., C.R.S.I.,

Borough Sanitary Inspector

REPORT OF THE SANITARY INSPECTOR

to the Borough of Tiverton

1st January to 31st December, 1948

Sanitary Inspector's Office,
Town Hall, Tiverton.
15th June 1949.

To His Worship the Mayor, Aldermen and Councillors
of the Borough of Tiverton.

Mr. Mayor, Madam and Gentlemen,

I have the honour to present this, my third Annual Report on the work carried out in my department during the year ended 31st December, 1948.

It has not been possible to carry out systematic house to house reconditioning of unfit houses, but many individual premises have been repaired and improvements to sanitary conveniences and washing facilities carried out as the result of informal action.

The number of applicants on the Council's Housing List continues to be high, in spite of the considerable number of families rehoused by the Council since the end of hostilities.

Also there appears to be a fairly large floating population, which adds considerably to the number of premises requiring inspection in connection with the Points Scheme.

The number of applications at December 1948 was 387, and the family groups were as follows:-

	Residing in Borough	Residing outside Borough	Combined Total
(1) Aged Couples	9	1	10
(2) Aged Widows	4	1	5
(3) Single Men desirous of marrying	4	1	5
(4) Young married couples without children	63	12	75
(5) Married couples with 1 child	133	22	155
(6) Married couples with 2 children	68	11	79
(7) Married couples with 3 children	37	3	40
(8) Married couples with more than 3 children	13	5	18
Totals	331	56	387

It will be noted from a perusal of the above table that there appears to be a great need for a two bedroom house and the Housing Committee did in fact decide after consideration of a report giving these figures to include a number of 2 bedroom maisonettes or flats in their housing programme.

A distressing feature of the housing shortage is the number of families who are without separate homes and the following table

gives the proportion of such families to the Total, and also the proportion of applicants engaged in agriculture or associated industry.

It is gratifying to learn that following consideration by the Housing Committee of the Ministry of Health's recent report of the Housing Management Sub-Committee of the Central Housing Advisory Committee it was decided that the Council's Points Scheme so closely approximated to the suggestions contained in the Ministry's report that it was unnecessary to amend our own points scheme.

I would like to record my appreciation of the great assistance afforded me by Miss R. Newton, clerk in my department, in connection with the Council's Points Scheme for the letting of houses.

The Borough boundaries embrace a large area of country typically rural in character, much of which being devoted to dairy farming. As a result of inspections and advice from myself a number of cowsheds and dairies have been reconstructed and several new cowsheds and dairies provided, whilst several are in course of construction. A considerable number of visits have been made in connection with Ministry of Agriculture Grant Aid Scheme to improve water supplies and the suitability of proposed sources of supply investigated.

Sanitary Circumstances of the Area

Water Supply

- (1) The water supply for the Town has been satisfactory in quality and quantity.
- (2) Bacteriological examinations have been made at regular monthly intervals of the treated water going into supply.
Water from the Allors supply (source springs at Norwood Common, supplemented by pumping from River Exe is both filtered and chlorinated.
- (3) Water from the Warnicombe Supply is only chlorinated.
- (4) The waters have no plumbo-solvent action.
- (5) The number of dwelling houses in the Borough and population supplied from public mains are 2732 houses, 11230 population.
The water is piped in direct to approximately 2192 houses, whilst approximately 540 houses are supplied by means of stand pipes. These latter houses being situated principally in Courts.

RODENT CONTROL

The Council's Rodent Operator, Mr. E. Luxon, has completed a further year's good work and it is noticeable that infestations at private dwellings in the town have almost completely been wiped out.

I feel confident that regular treatment of the Council's sewers is largely responsible for this and infestation in these sewers is now confined to a very small section of the town.

During the past year treatments have been necessitated largely at or adjacent to premises where domestic animals (poultry and pigs) have been kept.

The Borough Council's surface properties, refuse tip, salvage depot etc, have been regularly treated and it is possible to report that there are no reservoir type infestations existing in the area. Major infestations are few apart from farms in the area where they are frequent.

I have received several expressions of appreciation of the Council's rodent service from large business concerns during the year and I can confidently state that the service is performing a most useful public Health service in ridding the district of rats and mice.

PETROLEUM (CONSOLIDATION) ACT, 1928

48 Licences were reissued for the storage of 98,025 gallons of petroleum spirit, 4000 gallons of Crude Paraffin, 600 gallons of Tractor Vaporizing oil, 250 gallons paraffin, 100 gallons cellulose and 50 gallons of Naptha.

5 premises were inspected and advice on mode of storage given in respect of new applications and licences granted.

43 Premises were revisited in respect of annual licencing.

3 Licences issued for storage of Carbide of Calcium.

EXPLOSIVES ACT 1875

13 Applications were received for the registration of premises for the storage of gunpowder and mixed explosives. The premises of all applicants were inspected and reports made to the General Purposes Committee.

13 Certificates of registration were granted.

In conclusion, I wish to express my appreciation of the very helpful attitude of the Public Health and Housing Committees to me in my endeavour to serve the interest of the Council and the residents of the town.

I have derived great pleasure from the past year's work.

I remain,

Yours faithfully,

CHARLES JEFFRIES, M.S.I.A., C.R.S.I.,

Borough Sanitary Inspector
